

THE NEXUS WARDENS

The Nexus Wardens

Weavers of the Great Web

Background

The Geomantic Constructs. They are not living beings. They are arcane-geomantic constructs, carved from obsidian and jade, created by the Slann in ancient times to guard critical points in the Geomantic Grid. On the Blood Bowl pitch, they do not "play"; they are realigning and purifying a minor point of corruption (the match), and their "game" is actually a stabilization ritual.

Their perfect coordination is a reflection of the Network itself.

Playing Style

The Nexus Wardens don't "play" Blood Bowl, they geometrize it.

For them, the field is not grass, but a tapestry of ley lines, and the match is a purification ritual. Each player is a pulsating node in this living network; their power does not reside in themselves, but in synchronicity perfect that they establish. A Menhir is just one stone, but three They form an immovable mountain. Lightning is only a spark, but When connected to the network, it becomes an addressable beam.

The opponent isn't facing eleven players, but a walking constellation. Attacking one is to disrupt the The pattern is complete, and the network responds: the blows harden, the armor becomes impenetrable. And safe spaces collapse under reversed gravity. Advancing against them is like trying to knock down a wall whose stones reassemble themselves.

Winning with the Nexus Guardians is about imposing order on chaos. It's about demonstrating that the most powerful strategy isn't brute force, but perfect positioning, the flow of energy, and unwavering harmony. It's about transforming the battlefield into a closed circuit where your will is the driving force behind everything.

Losing to them is witnessing logic itself crumble. It's seeing your best players knocked out by the mere echo of a fall, or your perfect formation unraveled by a pass that twisted the space to land in impossible hands. It's not a physical defeat; it's being outplayed by a living equation that rewrote the rules of reality.

Team Rules

Race: Nexus Guardians / The Nexus Wardens

Category: Geomantic Construct Team

Rerolls: 0-8 | Cost: 70,000 coins | Apothecary: No

Sorcerer: Yes | Cost: 150,000 coins (*The Geomantic Net attracts unpredictable arcane powers*).

Maximum Fame: +1 (*Ancient and enigmatic beings, who generate more awe than sympathy*).

Cheerleader/Assistant Coach Check: Allowed. (*Although these are constructs, they respond to the energy of the environment; crowd excitement and tactical guidance can influence their effectiveness.*)

Special Team Rules

Tune in to the Nexus (Nexus Synergy)

Nexus Synergy: For each adjacent player standing with this ability +1 Connection.

Activate one Bonus per turn from your list of Connections. Only one player can activate Level 3 Bonuses per turn. of equipment. The Bonuses only activate on your turn except for Living Menhir which only activates on the opponent's turn. The Chain of Connections is generated by interconnecting players with Nexus Attunement.

Nexus Legacy: Any Injury 51+ on the injury table transforms the player into an Inert Golem instead of applying the injury. They also permanently gain the bonus they would receive for 2 Nexuses.

This player is a living conduit for the energies of the Geomantic Network. The more of them that group together, the more power they draw from the local nexus.

Network Link

Network Link: +1 Connection obtained by Tuning with the Nexus.

Runes carved into its core amplify its connection to the Geomantic Grid, drawing more power to nearby nodes.

Synergy Matrix

Synergy Matrix: While this player is standing, players with Nexus Attunement within 3 squares in any direction gain an additional +1 Connection.

Their presence amplifies your entire network, making your team much more consistent and less vulnerable. They are the heart of the team.

Total Synchronization (Total Synergy)

Total Synergy: Summons an inert Golem (*mercenary with 'BigHands'*) in an empty space within your Connection Chain. This Inert Golem chooses one action: *Block or Foul* an adjacent opponent, or attempt to collect the ball from the empty space or adjacent space; if successful, the ball is channeled to the summoner.

The golem never causes a *turnover*, it is removed after the chosen action and the summoner's turn ends.

The player channels the nexus's energy through the network so that a small Inert Golem can perform routine maintenance tasks.

Gravity Field

Field Gravity: When a block moves the opponent without a *Sidestep*, it will move them up to two squares. on the same trajectory. If this movement causes it to collide with another opposing player instead of pushing them, it takes a hit and causes an armor roll. This effect cannot remove a player from the field.

If the next activated player belongs to your Connection Chain, you get *Juggernaut* that turn.

A massive golem made of volcanic obsidian. In a group, its runes glow and become as strong as the mountain.

Trajectory Echoes

Trajectory Echoes: Each time this player successfully dodges, they can advance one space (Max. 1 per dodge) without a roll, as long as they maintain the same direction as in the original dodge.

By activating Trajectory Echoes, a player chosen from their Connection Chain gets *Dodge that turn*.

Its shape multiplies into echoes that follow the path of the flow while its displacement destabilizes the local gravitational field.

Neural Overload

Neural Overload: Pushes *against* players in their Chain of Connections, at the moment of the block, push the defender 1 square in the direction of the block and the attacker 1 square in the opposite direction, and wound rolls get -1. The other Living Menhirs in this Chain of Connections can grant their Bonus to another player instead of themselves at any time.

Their geomantic field destabilizes the cohesion of rivals. Mobile fragments of ritual menhirs. Individually, they are simple stones, whose runes project a static force field when aligned with others.

Chain Failure

Upon leveling up, this player must take Chain Failure: *If this player is knocked down in a block (by themselves or the opponent) resulting in a KO or Injury, the opposing player suffers an automatic concussion and the Inert Golem dies. This player's cost increases by 30k upon acquiring this skill.*

The remains of geomantic constructs whose energy core has been depleted or irreversibly damaged. They lack the ability to synchronize with the grid and are proof that without it, these guardians are little more than moving statues. Some Inert Golems accumulate residual geomantic energy that can suffer a catastrophic overload.

Team Roster

Position	MA	ST	AG	AV	Skills	Access Primary	Access Secondary	Cost	Quantity Max.
The Node Geomancer (Geomantic Node)		3	4	4	10	ÿ Synchronization matrix, Loner, Stand Firm	General, Agility, Pass, Strength	Mutations 140k 0–1	
Lightning Essential (Essential Lighting)		7	3	3	8	ÿ Tuning in to the Nexus: 1: Pro 2: +1MA 3: ÿ Total Synchronization	Passing	ÿ Network link: +1 Connections 80k 0–3	
Bastion of Obsidian (Obsidian Bastion)		7	3	3	8	ÿ Tuning in to the Nexus: 1: Block 2: +1ST 3: ÿ Gravity field	Strength	ÿ Network link: +1 Connections 100k 0–3	
Channeler of Flows (Flow Channeler)		6	3	3	8	ÿ Tuning in to the Nexus: 1: Wrestle 2: +1AG 3: ÿ Trajectory Echoes	Agility	ÿ Network link: +1 Connections 80k 0–3	
Living Menhir (Cheer up Menhir)		5	3	2	8	ÿ Tuning in to the Nexus: 1: Stand Firm 2: +1AV 3: ÿ Neural Overload	General	ÿ Network link: +1 Connections 70k 0–3	
Inert Golem (Inert Golem)		4	2	3	7		ÿ Chain Failure	+1 Stat 30k 0–11	

Recommended Roster 11 Players + 2 RR:

1x Geomantic Node: 140k
 2x Essential Lightning: 160k
 2x Obsidian Bastion: 200k
 2x Flow Channeler: 160k
 2x Living Menhir (Animate Menhir): 140k
 2x Inert Golem (Inert Golem): 60k
 2x Rerolls: 140k

Total: 1000k

Nexus Guardian Incentives

Nexus Guardians can hire Star Players, Sorcerers, and any other incentive listed on the Lizards team incentive list, except for Doctors and Apothecaries.

"The Nexus Guardians are a team of pure control and synergy."

Strength: Absolute tactical flexibility and incredibly tough defensive formations.

Weakness: If the opponent isolates your pieces, they become mediocre. You are completely dependent on positioning.

With the lore of the Old Ones and the Slann. They are the automatic guardians of the world's most sacred places, and their Blood Bowl "game" is actually a geomantic purification ritual.

The Nexus Wardens

A Shift in Living Geometry

The whistle sounds like the first note of a resonant equation. The field isn't grass, it's a diagram of power, and the ball is the focus that moves between its vertices.

The Living Menhirs advance. These are not steps, but calculated glides. They form a triad, and as they do, their runes light up in sequence. An enemy blockade crashes into one, and the stone barely budes, as if the mountain itself has absorbed the impact: its armor is not metal, but solidified geometry. Its mere presence becomes a force field for its local network, repelling attackers and destabilizing enemy lines while protecting its connections.

Meanwhile, the Essential Lightning is activated. It is a channeled lightning bolt that leaves a trail of geomantic sparks. Then he suddenly stops and activates Total Synchronization. With a gesture, he summons an Inert Golem that performs a crucial task—be it opening a path by blocking an opponent or recovering a ball—before dissolving back into the energy of the nexus. He doesn't play with players; he plays with the rules of space.

At the center, the Obsidian Bastion anchors reality. A rival attempts to flank it, but a Push result becomes a death sentence. The Bastion doesn't just yield space, it redefines it. The opponent is pushed back . Not once, but twice, his body turned into a projectile that brutally impacts a comrade. There was no direct hit, only the relentless application of a localized gravitational field. The force of the collision reverberates through the nexus, and the next Guardian to move will do so with the unstoppable determination of a Juggernaut.

The Flow Channeler receives the sphere. He doesn't catch it with his hands, but rather stabilizes it at a point of energy flow. Suddenly, an opponent steps in. The Channeler dodges, and as he does so, for a moment his form seems to unfold into Echoes of Trajectories, gliding once more in the same direction as if space itself were yielding to his passage. If another opponent blocks the path, the echo repeats: a new glide that, in theory, could allow him to cross the entire field in a single, impossible sequence of perfect evasions. This movement isn't just evasion; it's a choreography that tunes the network. As it stabilizes, a flash of its geomantic energy is transmitted through the nexus, granting a teammate the ability to Dodge, setting the stage for the next play. Its true power lies not in throwing the ball, but in clearing the path for the receiver.

And at the heart of it all, the Geomantic Node remains, immutable. It does not move, because it does not need to. It is the beginning and the end. Its mere presence amplifies the network, making every connection stronger, every bond harder to break. The Guardians around it become more than they are, their stats inflated by their proximity to the primordial power.

At the end of the shift, the formation remains intact. There are no injuries to attend to, only patterns to reinforce and energy to build. to preserve. The ball rests, a data point in the grand algorithm of the match.

This is what a turn for the Nexus Guardians looks like: not a game of strength and speed, but the enforcement of a higher order. A demonstration that the ultimate strategy isn't hitting harder, but defining the rules of the space where the battle is fought. Where other teams play Blood Bowl, the Guardians perform a ritual of absolute control.

Roster 1: "The Geometric Wall" (Defensive Control) 1000k

•1x Geomantic Node (140k) - The heart of the network. •1x
Essential Lightning (80k) - Your only speedy runner. •2x Obsidian
Bastion (200k) - Your striking power and control with Gravity Field. •1x Flow Channeler (80k) - Basic ball
handling. •3x Living Menhir (210k) - Cheap and resilient anchors
with Grab/Neural Overload. •5x Inert Golem (150k) - Scrimmage line and filler. •2x Rerolls (140k) -
Essential for key actions.

•Total: 1000k

Advantages: Incredibly solid defense, very difficult to move. Ideal for winning 1-0 and wearing down the opponent.
Weaknesses: Limited offense, you depend on a single Lightning bolt.

Roster 2: "La Telara a" (Balanced Control) - 1000k

•1x Geomantic Node (140k) •2x
Essential Lightning (160k) •1x
Obsidian Bastion (100k)
•2x Flow Channeler (160k) •3x Living
Menhir (210k) •3x Inert Golem
(90k) •2x Rerolls (140k)

•Total: 1000k

Advantages: Versatile and balanced between defense and attack.
Weaknesses: Less hitting power than the "Wall".

Roster 3: "The Living Circuit" (Offensive Control) - 1000k

•1x Geomantic Node (140k) •2x
Essential Lightning (160k) •1x
Obsidian Bastion (100k) •3x Flow
Channeler (240k)
•1x Living Menhir (70k) •5x
Inert Golem (150k) •2x
Rerolls (140k)
•Total: 1000k

Advantages: Very fluid offense, many agile players to move the ball. Ideal for scoring quickly.
Weaknesses: More fragile defense, less striking power.

Roster 4: "The Indestructible Network" (Pure Consistency) - 1000k

•1x Geomantic Node (140k) •2x
Essential Lightning (160k) •1x
Obsidian Bastion (100k) •2x Flow
Channeler (160k) •2x Living Menhir
(140k)
•3x Inert Golem (90k) •3x
Rerolls (210k) - An extra reroll is a safety luxury.
•Total: 1000k

Advantages: 3 Rerolls provide tremendous consistency for a team that relies on synergistic actions. Good defense.
Weaknesses: Only one Channeler slightly limits the ball game.
